WHERE IT GOES

This part in colour, its neighbours in grey

HOW TO MAKE IT AND HOW IT FITS

Cut two 60 mm lengths (motor uprights) and two 40 mm lengths (bar posts) of 40 x 40 x 4 angle; square and deburr.

60 mm feet, upright leg: two 6.6 mm holes 20 mm up from the board side, 18 mm each side of centre. Flat leg: two 6.6 mm holes 25 mm from the outside corner, 18 mm each side of centre.

40 mm feet, upright leg: two 6.6 mm holes 12 mm up, 10 mm each side of centre. Flat leg: one 6.6 mm hole 25 mm from the outside corner, on the centre.

Drill each foot clamped to its upright or post so the holes match.

Fit: the upright leg lies flat on the outside face of the upright or post; the flat leg lies on the board and points away from it;

M6 bolts with washers and nyloc nuts, the board bolts from below.

Check: upright or post stands square to the board.
