WHERE IT GOES

This part in colour, its neighbours in grey

HOW TO MAKE IT AND HOW IT FITS

Cut 270 mm of 22.2 mm (7/8 in) aluminum tube, square.

Deburr inside and out and chamfer both outside edges 0.5 mm so the lever and pod clamps slide on without scoring.

Fit: through both bar posts, 70 mm above the board, ends standing 10 mm out from each post. From the left: brake lever, pod, brake lever, each clamped with its own screw.

Lock it with the two M5 grub screws in the posts.

Check: the clamps tighten without the bar turning in the posts.
